

Conference on Moving from **RISK** to **RESILIENCE** for a Water Secure Future

27 November 2019 | India Habitat Centre | New Delhi

Climate variability is adding to the water stress across India with episodes of floods and droughts increasing in magnitude and frequency. This requires a need to building adaptive capacities and resilience for informed decision making. In the context of future requirement & expected impact of climate change it is vital to analyse the effect of droughts and floods. Along with the critical impact on water resources climate change also triggers the need of droughts & floods disaster risk management. Resilience is more than implementing the right technology or practice to assess and address risks of extreme events. It is an approach that should be part of a coherent and holistic strategy to ensure sustainable water resources and safe and secure water supply.

FOCUS AREA

- Managing Floods and Droughts In Urban Areas
- Reducing Hazard Vulnerability
- Climate Smart Agriculture
- Traditional Rejuvenating of Water Harvesting System
- Application of Decision Support System
- Nature Based Solutions
- Desertification

WHO SHOULD ATTEND

Representatives from industries of various sectors

Technocrats, Diplomats, Advisors and Policy Makers

NGOs, Grass root organizations, Institutes

Scientists & Researchers

Officials from Municipal Authorities, National Disaster Management Authority, Jal Board, Ministry of Jal Shakti, Ministry of Environment, Forest and Climate Change, Ministry of Urban Development, Ministry of Corporate Affairs and Government Agencies.
