

CII organised a conference on “**Climate Change & Water Connect : Moving from Risks to Resilience for a Water Secure Future**” on **25th March 2022**, over Virtual Platform. The Conference aimed to deliberate on developing requisite adaptation & mitigation measures which was incorporated into long term planning for addressing climate change in a holistic manner.

The Conference was attended by eminent leaders, strategic thinkers and captains of industry.

The conference focused on :

- Climate extremes and their impacts on natural physical environment and water risks
- Strengthened Climate resilience and water conservation
- Demand Management
- Developing alternative water sources
- Water sensitive urban development
- Mitigating water risks through basket of strategies – demand and supply side (experience sharing through case studies)
- Nature Based Solutions
